## Professional Profile Statement

I am a BSc Architecture graduate of the University of Pretoria, eager to gain practical experience in the architectural profession. My interests lie in sustainable and socially responsive design, particularly in how architecture can shape cultural and community experiences. Through academic projects and personal pursuits such as model-making, fashion, and craftsmanship, I have developed strong creative and technical skills. With my background in karate I also bring discipline, resilience, and teamwork to every challenge. I am seeking an internship opportunity where I can contribute while learning from experienced professionals.

---
